

Check out the all new.....
Vertical Mixing Feedcarts!

Key features include:

- Stainless steel mixing chamber.
- Stainless steel auger flight.
- Optional knives to process dry hay and baleage.
- Augers have 2 speeds for fast cutting.
- Large diameter auger pipe to help prevent hay from wrapping.
- Twin auger design standard on all models, allowing increased capacity while still fitting through narrow doorways and under pipelines. (see reverse for dimensions)

Multiple samples taken by a professional nutritionist have showed excellent mix quality with no dead spots.

13³/₄" carbide tipped knife
